

**CARSON CITY AIRPORT
REHABILITATE AND REALIGN RUNWAY 9/27 and TAXIWAY A**

Project Description

The proposed work includes the realignment and construction of Runway 9/27 (6,100'x75') and the realignment and construction of Taxiway A (6,100'x50') with its associated connectors. The proposed work also includes the installation of a new electrical vault, medium intensity runway lighting, medium intensity taxiway lighting, segmented circle with lighted wind cone, precision approach path indicators, lighted hold signs, distance remaining signs, supplemental wind cones, and runway end identifier lights. Also included is the reconstruction/relocation of the self-service fueling facility and the relocation of six hangars with the construction of a new 300' taxilane.
